Predicting Barriers Planning Template

Use before any lesson, routine, or part of the day. Plan for the full range of learners in the room.

Teacher: _____ **Date:** _____ **Part of the day, lesson, or routine:** _____

Firm goal

What will students know or be able to do? The goal stays fixed. Only the pathways flex.

01 Who might struggle to access this?

What might be hard about this for some students?

COMMON BARRIERS: CHECK ALL THAT APPLY

- ☐ Language or vocabulary
- ☐ Fine motor
- ☐ Sensory needs
- ☐ Reading or decoding
- ☐ Social or peer interaction
- ☐ Attention or focus
- ☐ Emotional regulation
- ☐ Prior knowledge gaps
- ☐ Executive function
- ☐ Other:

Ready for more?

Another way in for kids who find this easy?

02 What's the fix that helps everyone?

What could we create or point students to so they can get past that barrier?

SUPPORT BANK: CHECK WHAT YOU WILL USE

- ☐ Visual support (pictures, icons, anchor chart)
- ☐ Alphabet chart or sound wall
- ☐ Choice of how to show thinking
- ☐ Think-pair-share or partner support
- ☐ Flexible seating or workspace
- ☐ Open-ended extension or challenge
- ☐ Sentence frame or word bank
- ☐ Choice of tool or material
- ☐ Movement, act it out, or draw first
- ☐ Pre-teach key vocabulary
- ☐ Small group or check-in
- ☐ Calm corner or regulation tool

MY PLAN

03 How will I know the barrier was removed?

What does success look, sound, or feel like? For which students specifically?

Looks like

Sounds like

Feels like

Students I'll watch for

What actually happened?

Come back after the lesson or routine. Start with what worked, then notice what to tweak.

Part of the day, lesson, or routine: _____ **Date tried:** _____ **Firm goal (copy from page 1):** _____

01 What evidence did I see that a barrier was removed for someone?

Name the student and what you noticed. Celebrate it.

02 Which students still hit a barrier? What got in the way?

Look at the design, not the child. What in the routine made it hard?

03 What would I change in the design next time?

Pick one small move to try. Then plan it again on page 1.

One move I'll try next

You already know your kids. Every time you predict a barrier and design for it, your toolbox grows. You have more tools than you think.

UDL FOR LITTLE LEARNERS · SAMPLE PLAN

Sample: Lining up for a transition

A filled-in page 1, based on the lining up strategies in the Transitions chapter. Filled-in text is in blue.

SAMPLE

Teacher: Kindergarten team **Date:** Monday **Part of the day, lesson, or routine:** Lining up to leave the room

Firm goal

What will students know or be able to do? The goal stays fixed. Only the pathways flex.

Everyone lines up at the door safely and calmly, ready to walk to our next place.

01 Who might struggle to access this?

What might be hard about this for some students?

COMMON BARRIERS: CHECK ALL THAT APPLY

- [ ] Language or vocabulary
- [ ] Fine motor
- [x] Sensory needs
- [ ] Reading or decoding
- [x] Social or peer interaction
- [x] Attention or focus
- [x] Emotional regulation
- [ ] Prior knowledge gaps
- [x] Executive function
- [ ] Other:

Some kids rush to be first. Some are still learning body control and personal space. Everyone needs it to be predictable.

Ready for more?

Another way in for kids who find this easy?

Give them a job: line leader, caboose, door holder.

02 What's the fix that helps everyone?

What could we create or point students to so they can get past that barrier?

SUPPORT BANK: CHECK WHAT YOU WILL USE

- [x] Visual support (pictures, icons, anchor chart)
- [ ] Alphabet chart or sound wall
- [ ] Choice of how to show thinking
- [ ] Think-pair-share or partner support
- [ ] Flexible seating or workspace
- [ ] Open-ended extension or challenge
- [ ] Sentence frame or word bank
- [ ] Choice of tool or material
- [ ] Movement, act it out, or draw first
- [ ] Pre-teach key vocabulary
- [ ] Small group or check-in
- [ ] Calm corner or regulation tool

MY PLAN

Line order: everyone knows their spot. Dot spots on the floor a few feet apart. A line-up song. Rotating jobs.

03 How will I know the barrier was removed?

What does success look, sound, or feel like? For which students specifically?

Looks like

Walking to the door. Everyone on a dot.

Sounds like

The song, then quiet. No "me first!"

Feels like

Calm. No bumping. Kids know what's next.

Students I'll watch for

The kids who usually race to be first.
