

UDL for Little Learners | Predicting Barriers Planning Template

Use before any lesson, routine, or part of the day. Plan for the full range of learners in the room.

Teacher:	Date:	Part of the Day / Lesson / Routine:
Firm Goal What will students know or be able to do? This stays fixed -- only the pathways flex.		
Question 1 What might be hard about this for some students -- or what is another way to meet this goal for students who find it easy? COMMON BARRIERS -- check all that apply: ☐ Language / vocabulary ☐ Attention / focus ☐ Fine motor ☐ Emotional regulation ☐ Sensory needs ☐ Prior knowledge gaps ☐ Reading / decoding ☐ Needs more challenge ☐ Executive function ☐ Social / peer interaction	Question 2 What could we create or point students to in order to overcome that barrier? SCAFFOLD BANK -- check what you will use: ☐ Visual support (pictures, icons, anchor chart) ☐ Sentence frame / word bank ☐ Alphabet chart / sound wall ☐ Choice of tool or material ☐ Choice of how to show thinking ☐ Movement / act it out / draw first ☐ Think-pair-share / partner support ☐ Pre-teach key vocabulary ☐ Flexible seating or workspace ☐ Small group or check-in ☐ Open-ended extension / challenge task ☐ Calm corner / regulation tool	Question 3 How will I know if the barrier was removed? What does success look, sound, or feel like? For which students specifically?
AFTER -- Come back after the lesson. What actually happened?		
Which students still hit a barrier? What got in the way?	What would I change in the design next time?	What evidence did I see that a barrier was removed for someone?
